

Habitat Management (CSP Enhancements)

October 2005

Colorado Enhancement Activity Job Sheet H-5

Name: _____

Conduct Haying Activities to Minimize Wildlife Mortality

Payment = \$2.00 / acre / year for each acre where haying is conducted in a pattern that minimizes wildlife mortality

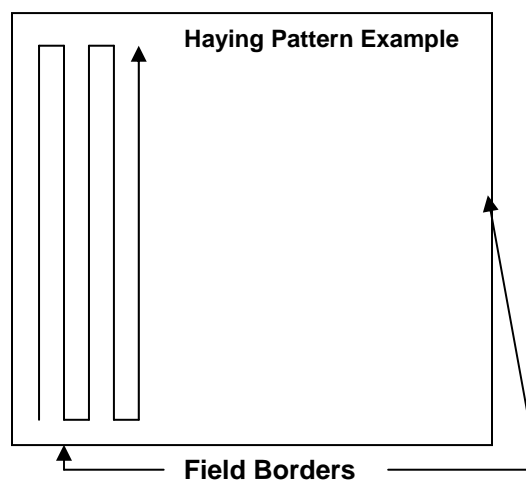

\$2.00 / acre / year for each acre where nighttime haying activities are eliminated to protect wildlife

This enhancement is subject to payment caps. Actual payments will depend on CSP Tier level and the number of acres enrolled.

This enhancement will only be performed during daylight hours utilizing a flushing bar attachment. Thus reducing bird mortality caused when mowing and haying activities start at the outside edge of a field and progress to the center trapping birds in the center of the field and potentially killed them. Allowable haying patterns are: 1) begin on one end of the field and work back and forth across the field or 2) begin in the center of the field and work outward.

Documentation Required: Use the following Table for documentation. Attach a plan map showing the field numbers where this enhancement will occur.

Field Identifier(s)	Acres

Briefly Describe Your Haying Pattern: _____

I certify that I am conducting haying activities as described above.

Name: _____ Date: _____
